Rewiring Inclusion: Strategies, Tools and Techniques to promote barrier-free learning

A national one day conference in Nottingham at the National College on Tuesday 9 February 2010, organised jointly by ALT and JISC TechDis for any staff whose work and role affects learners and learning.

Call for workshop proposals

If you or your organisation has good practice to share in the inclusive use of technology to support learning, we invite you to submit a proposal to run a 45 minute workshop at the conference.

To submit a proposal, please complete the form at <http://tinyurl.com/yjog4pb> by 12.00 noon on Friday 4 December 2009. We will let proposers know the result of the selection process before Christmas, to give those invited to run workshops plenty of time to prepare.

We will meet reasonable travel and subsistence costs for those selected to present; in each case for up to two people involved in the presentation. We will meet the costs of overnight accommodation for one presenter if staying overnight at the National College; the second presenter attending would be at cost.

Depending on the nature of proposals received we may require presenters to run their workshop twice during the day.

If you are not presenting but would like to attend, please note that further information about the conference will be distributed widely later in November. Booking for the conference will open in mid-November from <http://www.alt.ac.uk>. To register your interest for the event, and to be kept informed about arrangements, please join the relevant low-volume email announcements list at <http://www.alt.ac.uk/lists.html>.

We do hope you will be able to contribute or participate in what we know will be an exciting and informative event. In case of difficulty in submitting a proposal using this process, please email Hayley Willis, Head of Conferences and Events at ALT, (hayley.willis@alt.ac.uk), who is working closely with JISC TechDis in the coordination and running of this event.

Yours sincerely

Sal Cooke
Director of JISC TechDis

Seb Schmolter
Chief Executive of ALT
