CMALT Australasia is a professional accreditation scheme which enables people whose work involves learning technology to:

- have their experience and capabilities certified by peers;
- demonstrate that they are taking a committed approach to their professional development.

The basis of the accreditation process is a portfolio which contains both evidence and reflection in relation to a number of key criteria. CMALT Australasia allows you to gain recognition for personal and professional development, while encouraging you to reflect on the broader context which is shaped by social, cultural and political factors.
