About ALT

Become part of the UK's leading membership organisation in learning technology...

...gives you access to global contacts at the annual conference

The ALT annual conference, altc, is the UK's main conference for learning technologists and one of the largest conferences of its kind. Members get free or discounted access to altc and other ALT events, workshops and webinars.

...enables you to set up, join and get involved in Special Interest Groups

That bring together people around a common theme, such as Massive Open Online Courses (MOOCs), Open Education, Video in Education, etc.
Get support and give input. There are ALT groups in Scotland, Wales and regions of England.

...recognises excellence with the Learning Technologist of the Year Award

Running since 2007, this national award celebrates and rewards excellent practice and outstanding achievement in the learning technology field. The award provides a national platform for innovation in learning technology.

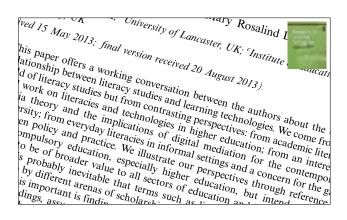

...make your voice heard in policy consultations

Organisational and sponsoring members are represented at the ALT Policy Board where they are consulted on current education and learning technology policy inputs.

Individuals can contribute to policy work via consultations and surveys as well as actively engaging in ALT's governance.

...get the latest peer-reviewed, open access research

ALT's Research in Learning Technology journal has an editorial board of leading learning technologists. The journal encourages research that informs good practice and contributes to the development of policy. It recently acquired article metrics so readers and authors can easily see the number of downloads each article gets and how it is shared via social media.

Over 1300 members and growing

...communicating the latest news and opportunities

ALT aims to communicate well with all our members. Some of the channels we use are the Online Newsletter, a fortnightly Members-only Email Digest and weekly postings on social media. Members also have access to the Discussion List on which there are lively debates on current issues in learning technology.

...provides accreditation through the Certified Membership Scheme

The Certified Membership Scheme (CMALT) is a peer-based professional accreditation scheme developed by ALT to enable people whose work involves learning technology to have their experience and capabilities certified by peers, and to demonstrate that they are taking a committed and serious approach to their professional development. ALT has also partnered with ascilite to deliver CMALT in Australasia.

Over 200 Learning Technologists have been accredited through CMALT

Who are we?

ALT is the Association for Learning Technology, an independent, self-funded, membership-based charity working to improve practice, promote research and influence policy in learning technology.

What we do

We promote the intelligent use of learning technology, strengthen research and practice, shape policy, represent our members as the authorative voice on learning technology's role in learning. We further leadership and professional development and communicate clear information about our work and activities with members, partners, agencies, politicians and the public.

What we value

Our values are being participative, open, collaborative and supportive, responsive, agile and innovative, open and welcoming, independent and self-funded, transparent, democratic and fair.

Where we are active

ALT members are part of an active community.

- ♦ Our members are based in the UK and in countries across the globe.
- Over the last 20 years, this community has grown to include those who are actively involved in understanding, managing, researching, supporting or enabling learning with the use of learning technology in the UK and internationally.
- ♦ The community is about having access to others' experience and wisdom; making new contacts and expanding personal networks in open, supportive spaces where collaboration and innovation is constantly encouraged.
- Our community is a diverse group of people from higher education, further education, schools, government and commercial organisations

"ALT is about people, it's about the network, it's about the community. Being able to talk to them, or even learn from them about what works and what doesn't work is really valuable and important."

Andy Beggan (Head of Learning Technology, University of Nottingham)
