

altc2014 Riding Giants: How to innovate and educate ahead of the wave

ASSOCIATION
FOR LEARNING
TECHNOLOGY

The 21st annual conference of the
Association for Learning Technology
1-3 September 2014

For the 21st annual conference of the Association for Learning Technology we shall bring together evidence, theory, success stories and critical thinking from across education around five key themes:

- ◇ Predicting Giants
- ◇ Learning to ride
- ◇ Evidence on board
- ◇ Staying up, mobile and personal
- ◇ All agog

ALT's annual conference is the leading event focusing on learning technology and typically attracts over 500 participants from all over the world, with many more engaging with the conference online.

The conference will have a variety of sessions across the five themes, keynote and invited speakers, an exhibition, discussions of policy and development, and an active social programme with plenty of opportunities for networking.

Whether you are new to the learning technology domain, or are an experienced practitioner, supplier, funder, policy make, researcher, writer, or presenter from other fields, join us in 2014 to contribute your vision, share your experiences, pose your questions and show your passion for innovation and education. With your help altc2014 can be a truly outstanding, influential, and enjoyable event.
